Brief — Financial stress & income context

ANALYSIS LENS National view · 13,994 records

Non-poverty context estimates: income pressure, emergency liquidity difficulty and income-band concentration from the embedded Stata band labels.

INCOME PRESSURE
80.2%
income does not cover costs — context, not poverty

EMERGENCY MONEY DIFFICULT
93.3%
self-reported liquidity stress

LOW PERSONAL INCOME BAND (MONTHLY)
4.5%
weighted population 995,402

IRREGULAR OR SEASONAL INCOME (MONTHLY)
0.0%
structural zero — band 16 has no responses in the file

LOW ANNUAL INCOME BAND
6.0%
weighted population 1,100,618

OFFICIAL POVERTY RATE
Blocked
6 required inputs still missing

WHAT THIS BRIEF CANNOT CLAIM

None of these figures is a poverty rate. Income bands are self-reported and band-coded — not household consumption or a welfare aggregate. EI-02's 0.0% is a structural zero, not evidence of zero irregular income. An official poverty estimate stays blocked by the six-input unlock contract.
